

TH SERIES

CORRECTIONAL SERVICES HOUSINGS

Secure triangular corner mount housings to suit PCB and conventional cameras commonly used in Correctional Service environments.

The cover is recess mounted into the steel frame ensuring that tools cannot be inserted to prise the lens away from the housing. Featuring rugged construction, tamper resistance and with no centre projections the enclosures limit self harm issues.

New bracket design for the 485 and 600 models allows easier adjustment and more positive locking action for the camera. The CMH01 & CMH02 accept similar sized cameras as the TH485 & TH600 in a more compact housing when space is limited.

OPTIONS

All housings are supplied with adjustable camera mounts. Tamper and vibration sensing switches are available for all models.

APPLICATIONS

Correctional services housings designed to fit in corners, against the ceiling.

SPECIFICATIONS

Construction

1.6mm zincanneal.

Finish

Black texture polyester powder coat in standard housing.

Lens

6.0mm polycarbonate.

Access

M6 post cap security screws.

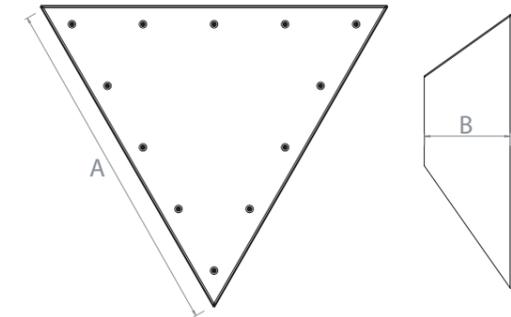

Cable Entry

Open triangular space at top rear of the housing.

Max. Camera Size

Refer to 'B' dimension for overall depth details.
